

Asthma Friendly

Schools

“
The Asthma Friendly Accreditation process was really easy thanks to the support of our local NHS colleagues and the training was really informative and supported all of our staff to be in the best position to deliver the new policies that we have put in place.
”

David Scales,
Astrea Academy, Doncaster

Did you know?

Asthma affects 1 in 11 children and young people in the UK. Sadly, the UK has one of the highest rates for childhood asthma in Europe. Children in deprived areas are affected the most.

Let's work together to reduce harm and improve the quality of life for these children. Join us in supporting children with asthma!
