

Do you know of children & young people with Asthma?

You are now able to access **free online training** to improve your knowledge and **help to care for children and young people with asthma** in the best way possible.

This training targets a range of people working closely with children and young people, such as those based in **schools, after-school clubs, sports centres, and community organisations**.

NHS England has been working with a national working group for training and education as the **UK has some of highest death rates in Europe for childhood asthma** and health outcomes are even worse for those children and young people living in the most deprived areas.

Progress depends on **improving the knowledge and skills of everyone** who cares for children and young people with asthma.

This training provides a **clear structure** for both health and non-healthcare professionals to **understand what knowledge** they need.

More information on the training can be accessed [here](#).
